

Dear Mr. Wadsworth:

The EQ Airport Services Division would like to thank your company for its work on the waste glycol processing facility at the Salt Lake City International Airport and congratulate you for a job well done.

We were especially impressed with the knowledge and professionalism of your staff. The project was on a very aggressive schedule and your people were instrumental in keeping it on track, even when confronted with unreliable material deliveries, labor issues and other unexpected problems.

Not only was our project completed on time and within budget, but your people made it all seem effortless. It was refreshing to deal with a company that keeps its promises and truly looks after the needs of its customers. I would gladly recommend Cal Wadsworth Construction to anyone seeking an experienced and professional general contractor.

It was a pleasure dealing with you and we will certainly contact Cal Wadsworth Construction regarding any future projects.

Sincerely,

Michael Roth-Purcell
Operations Manager
EQ-Airport Services

James M. Wallace
General Manager
